Research Projects:

- Evaluation of the relationship between spiritual health with pain self-efficacy and quality of life in cancer patients.

- Evaluation of the attitude of patients' relatives towards euthanasia.
- The safety and efficacy of transcranial direct current stimulation as add-on therapy to fluoxetine in obsessive-compulsive disorder: a randomized, double-blind, sham-controlled, clinical trial.
- Serum Eicosapentaenoic and Arachidonic Acids Concentration and Cognitive Function in Patients with Coronary Artery Disease.

Thesis Supervision:

- Comparison of cognitive impairment in patients with coronary artery disease (CAD), using the Montreal Cognitive Assessment (MoCA) and the Mini Mental State Examination (MMSE)
- Frequency of cognitive impairment in patients with schizophrenia; using Montreal Cognitive Assessment
- Evaluation of cognitive impairment in patients with Chronic Kidney Disease (CKD), using the Montreal Cognitive Assessment (MoCA) in comparison with the Mini Mental State Examination (MMSE)
- The impact of educational motivation and self-acceptance on creativity among high school students
- Investigating the effects of mobile waves on students' executive functions
- Investigating the relationship between Internet addiction and general health among students
- Attitude to death and attitude to life and their relationship with psychological well-being in pregnant and non-pregnant women

- Assessment of cognitive function in elderly people using the Mini- Mental State Examination (MMSE) and Montreal Cognitive Assessment (MoCA)
- Evaluation of cognitive function in substance abusers using the Mini- Mental State Examination (MMSE) and Montreal Cognitive Assessment (MoCA)
- Assessment of cognitive impairments in Multiple Sclerosis (MS) patients with Mini-Mental State Examination (MMSE) and Montreal Cognitive Assessment (MoCA)
- The relationship between spiritual health and psychological well-being with high school teachers' professional commitment
- Evaluating the relationship between coping style and psychological capital with accountability in Red Crescent (Helal Ahmar) Staff
- The relationship between spiritual health and psychological well-being with general self-efficacy in mothers of children with mental disability and autism
- Relationship between spiritual health and happiness with psychological flexibility in university students
- The relationship between spiritual health and psychological well-being with emotional divorce
- Relationship between executive functions and math performance in students based on Wisconsin card classification tests and Tower of London
- The effectiveness of cognitive-behavioral therapy training on anxiety and quality of life in postmenopausal women

Teaching:

- Neurophysiology and endocrine system in B.S. of psychology;
- Neuropsychology and neurophysiology in M.S. of psychology;
- Physiology in B.S. of Biology; Nursing; Operating room nursing; Midwifery; anesthesiology; and medical emergencies;
- Approach to movement disorder (Parkinson's disease) in general medicine;
- Approach to dementia (Alzheimer disease) in general medicine;
- Neurophysiology in general medicine and dentistry;
- Participation in medical ethics in general medicine.
